Problem

- Lack of information
- Not knowing the language
- Unfamiliar Culture and Food habits

Solution

- We have an app : *À Table*
- Use AR to show real time information about the restaurant / grocery stores
  - Current offers
  - Menu
- Use localization to present it in your language of choice

Issues

- Android `.so` library duplicates - Solved early
- Unicode - Solved with Regex
- Arabic - Yet to be solved

What's next

- "Nearby stores"
- Further user input (Reviews, Ratings)
- AR based on location/accelerometer
- Integrate
    - Google Places API,
    - TripAdvisor,
    - GoogleTranslate
- User-based recommendations

Thank you / ধন্যবাদ
